## TRUCK & BUS JACK

LIFTECH truck & bus jacks are used extensively in the tyre industry. Their compact design allows them to fit easily between tandem wheels & the long "T" handle helps in positioning the jack under vehicles with low overhang. Large diameter wheels allow easy positioning. Other features include a fast lifting air motor and a self retracting ram which eliminates manual lowering of the jack. Tested and approved to Australian Standard AS/NZS 2693:2017.
